

## Green Innovative Users' Guide - Our Common Natural Values

### Newsletter

Mary's Route Public Benefit Association and the Municipality of Palást are working on the implementation of an innovative game, which will result in a web and mobile phone game called SmartZ.

The name SmartZ comes from an English word, meaning roughly 'smartness'.

The first and perhaps most important goal is for children, the future generation, to recognize the beauty of the nature around them, to learn to live in and with it, and to learn to protect it.

But of course, the older age group can also find useful information, as we all know the saying that it is never too late to learn.

With the development of the application, many additional results are expected, as the application in progress will be more interesting and colorful with the expanding knowledge of the natural values to be surveyed and recorded on a given route, through the collaborations with their maintainers.

The cooperation between the Municipality of Palást and Mary's Route Public Benefit Association is implemented within the framework of the **Interreg V-A Slovakia-Hungary Cooperation Program project ID SKHU / WETA / 1901 / 4.1 / 229, Green Innovative Users' Guide - Our Common Natural Values**, which aims to further strengthen cooperation between the two partner countries through joint development with the involvement of new partners.

We will provide information on the further progress of the joint work in our next newsletter.
