

Green Innovative Users' Guide - Our Common Natural Values

Newsletter

We have previously reported on the cooperation between Mary's Route Public Benefit Association and the Municipality of Palást, in which they are working on the implementation of an innovative game.

The game will be playable on the web as well as on mobile phones, and as you may have seen in our newsletter before, its name is SmartZ, a name derived from an English word meaning 'smartness' in a rough translation.

- A game plays 10 cards and questions from the 40-50 cards available in the background.
- Viewing a given card - visible for 10-15 seconds
- We receive questions based on the card. We can read various information on this card
- Based on the information, we can get 1-2 questions from up to 5 different questions on a card
- At the end of the game, a check and correction will follow, which in both cases will mark the correct answer for us
- Displaying result after 10 laps
- If the user registers, then:
 - We can save and review our previous results
 - Appearance on the merit wall becomes available.

The cooperation between the Municipality of Palást and Mary's Route Public Benefit Association is implemented within the framework of the **Interreg V-A Slovakia-Hungary Cooperation Program project ID SKHU / WETA / 1901 / 4.1 / 229, Green Innovative Users' Guide - Our Common Natural Values**, which aims to further strengthen cooperation between the two partner countries through joint development with the involvement of new partners.

We will provide information on the joint work and further progress of the partners in our next newsletter.
